Minerals: A Guide to the Most Common Decorative Minerals and Rocks

By The Natural History Museum

The Natural History Museum. Pamphlet. Book Condition: new. BRAND NEW, Minerals: A Guide to the Most Common Decorative Minerals and Rocks, The Natural History Museum, Minerals are naturally occurring elements or chemical compounds, formed by geological processes such as volcanic eruptions, that have a crystal structure. They are beautiful, essential and hold the secret of the technological advances of the future. This handy 8-page fold-out guide is designed to help readers identify 39 common minerals found around the world. At least one striking colour photograph and some key facts are provided for each mineral featured. The guide is double-sided and gloss laminated with a concertina fold.

Reviews

Merely no words to spell out. It is amongst the most awesome publication i have read. Your life span will likely be transform as soon as you full reading this book.

-- **Marvin Okuneva**

Completely among the best publication I have got at any time go through. I have got go through and so i am confident that i will likely to read again once more down the road. It is extremely difficult to leave it before concluding, once you begin to read the book.
