

Bulletin Volume 100, V. 4

By United States National Museum

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .meters), bottom temperature 47.5 F. (8.6 C). It will be seen that the depths agree well with those already published from the North Pacific, and it is also interesting that the bottom temperatures are comparatively high, as was the case in the stations noted off Japan. With these added stations we now know considerable about the distribution of this species, which was described by Brady from a single Challenger station off Japan. Its range can now be well filled in from off southern Japan to Australia, including the Malay Archipelago, and probably occurs widely distributed among the East Indian and Oceanic Islands. Chapman records it from off Funafuti. SIPHOGENERINA BIFRONS (H. B. Brady), Tar. STRIATULA Cushman. Plate 56, fig. 4. Siphogenerina bifrons (H. B. Brady), var. itrialula Cushman, Proc. U. S. Nat. Mub., vol. 51, 1917, p. 662. Description.--Differing from the typical in having the surface...
