Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

TECHNOLOGIC PAPERS OF THE BUREAU OF STANDARDS VOLUME 81-95

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: .introduced. As the temperature falls particles of paraffin rise to the surface. These collect as a scum in front of the roll and are easily removed. If the washer becomes coated the wax may be forced through it by means of steam. In general, the pulp is clean about three hours after it has been placed in the beater. If the pulp has been well washed in the previous operation, the time required is lessened. Any paraffin remaining in the pulp after the treatment in the beater is caught by the screen boxes of the paper machine. In the experiments conducted it proved to be a very small quantity. If the stock contains much ink it must be treated with caustic soda and bleached in the usual way. If ink is absent this operation is unnecessary. It is well to use the beater employed for the work for this purpose alone, and the roll should be cleaned occasionally by means of hot water or steam. By installing the necessary tanks it should be possible to carry out the process on a larger scale without difficulty. The size and design of these would vary with the individual requirements, but the equipment requires little space. Several trials of the method have been made and the results submitted to the manufacturers interested. The recovered paraffin was somewhat darker in color than the original wax, the color depending upon the nature of the ink present. It is obvious that the...
