As members of this Association, we are constantly in need of advice as to the quality of a water. To have an analysis made is often a matter of considerable deliberation, expense and delay. For full information a complete sanitary analysis is necessary, but there are often times when one would like to have a rough, quickly-learned idea as to the presence or absence of contamination. These rough qualitative tests have been more or less popular from the earliest times. Historically, there are numerous references. The points in question are the utility of any such preliminary testing and the present-day understanding permitting a more reliable interpretation of the tests. The same is true in rapid rough tests as in all sanitary water analysis: We desire to quickly ascertain the presence of specific disease microorganisms as a basis for an opinion. To enumerate...
